

Additional notation:

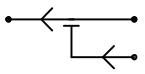

Use blocks like IC-s for easier notation
example: 4->4 balancer:

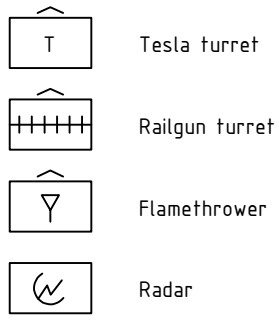

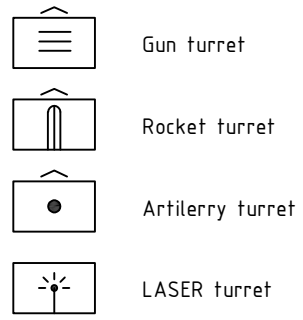

Annotate belts if necessary:

Sideloading belt:

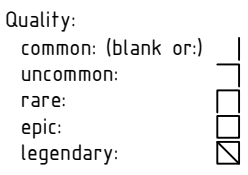

Military:

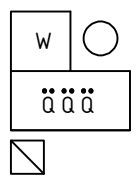

Modules and quality:

M: place for modules
modules:
S/P/E/Q
for every level add 1 dot on the top:
Ṣ for level 2

if there isn't place for modules, use space above or below

Example:
legendary big drill mining tungsten with 3 level 2 quality modules:

Quantity:
n: how many of that component is interconnected, E.g.: storage tanks

for components without dedicated quantity indicator use "xn" format, E.g.:
